#### Introduction

The WiFi Repeater is a combined wired/wireless network connection device designed specifically for small business, office, and home office networking requirements. It allows a wireless network to be expanded using multiple access points without the need for a wired backbone to link them. It also works well with other 11b/g and 11n protocol wireless products.

**NOTE:** If you need to **reset** the WiFi Repeater, you need press and hold the reset button inside the tiny hole for **10** seconds.

#### Package Contents

Before you starting to use this router, please check if there's anything missing in the package, and contact your dealer of purchase to claim for missing items:

- 1 x Wireless-N Repeater
- 1 x RJ-45 Networking Cable
- 1 x Quick Installation Guide

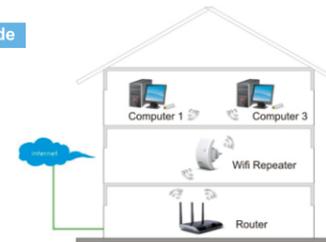

#### Getting Started

##### Setting up a Wireless Infrastructure Network

For a typical wireless setup at home (as shown below), please do the following:

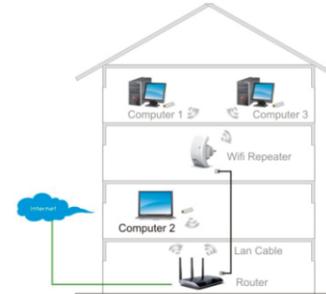

##### Wireless Repeater Mode

You will need WiFi  
 AP/Router Internet access

##### Wireless AP Mode

You will need broadband  
 Router Internet access

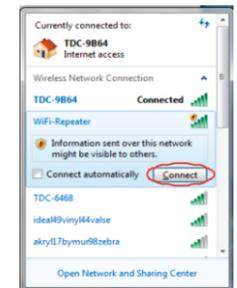

Connect the WiFi-Repeater to your Router/Switch with RJ-45 Cable

#### How to configure the Wi-Fi Repeater

You can configure the Wi-Fi Repeater by connecting it with your computer/laptop with enclosed RJ45 cable or wirelessly.

##### A. Configure the Wi-Fi Repeater wirelessly.

A1. Plug the Wi-Fi Repeater to a wall socket.

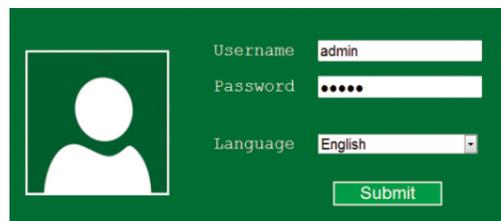

A2. Click on the network icon (or ) on the right bottom of your desktop. You will find the signal from the **Wi-Fi Repeater**. Click on **'Connect'** and wait for a few seconds.

A3. Open web browser and type <http://192.168.10.1> in the browser's address box. This number is the default IP address for this device.

**Note:** Please check whether the WiFi-Repeater accord with factory default settings once you can't download <http://192.168.10.1>. If you are still not sure what reasons, you can reset the WiFi-Repeater, just need to press the **reset** button for **10** seconds, then try again.

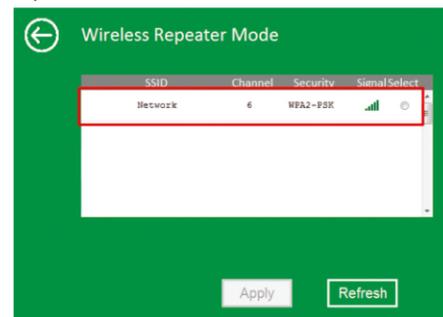

A4. The login screen below will appear. Enter the "User Name" and "Password" then click "OK" to login. The default User name is "admin" and Password is "admin".

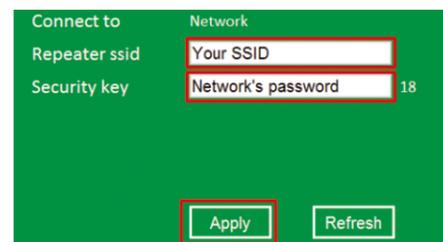

A5. After logging in, you will see the web page below: Click on **'Repeater'** to continue.

A6. Select your Wireless SSID to continue.

A7. When you see below, please do not change any setting but only insert the key of your network.

Click on **'Apply'** button, The Repeater will restart. Wait for a few seconds your Wi-Fi Repeater is ready for use.

\* The default wireless SSID and Security key of Wi-Fi Repeater is same as your AP/router.

##### B. Configure the Wi-Fi Repeater with RJ45 Cable.

1. Plug the Wi-Fi Repeater to a wall socket. Connect your computer / laptop with the Wi-Fi Repeater with enclosed RJ45 Cable.

2. Follow process A3 to A7 to configure your Wi-Fi Repeater.

##### C. Configure the Wireless AP Mode.

1. Plug the Wi-Fi Repeater into a wall socket.

2. Follow process A3 to A4.

3. Click on 'AP' to continue.

4. The following message will be displayed on your web browser:

SSID	the "SSID" of your wireless network.
Channel	Auto (recommend)
Security type	Setup the wireless security and encryption to prevent from unauthorized access and monitoring. Supports 64/128-bit WEP, WPA, WPA2, WPA/WPA2 encryption methods.
Security key	the "Password" of your wireless network.

Click on **'Apply'** button, The Repeater will restart. Wait a few seconds your Wi-Fi Repeater is ready for use.

## How to connect your computer/laptop with the Wi-Fi Repeater

### Adding a Wireless computers to the WiFi-Repeater

1. Log on to the computer.
2. Open Connect to a Network by right-clicking the network icon ( ) or ( ) in the notification area.
3. Choose the wireless network from the list that appears, and then click **Connect**.
4. Type the network security key or passphrase if you are asked to do so, and then click **OK**. You'll see a confirmation message when you are connected to the network.

5. To confirm that you added the computer, do the following: Open Network by clicking the **Start** button ( ), and then clicking **Control Panel**. In the search box, type **network**, and then, under Network and Sharing Center, click **View network computers and devices**. You should see icons ( ) for the computer you added and for the other computers and devices that are part of the network.

Note : If you don't see icons ( ) in the Network folder, then network discovery and file sharing might be turned off.

Click **'Apply'** button, The WiFi Repeater will restart.

### Change Management password

Default password of Wireless Router is **"admin"**, and it's displayed on the login prompt when accessed from web browser. There's a security risk if you don't change the default password, since everyone can see it. This is very important when you have wireless function enabled.

To change password, please follow the following instructions: Please click **'Management -> Password'** menu on the web management interface, the following message will be displayed on your web browser:

**Change your password**

User name

New password

Retype password

If you want to keep original password unchanged, click **'Cancel'**.

Click **'Apply'** button, The WiFi Repeater will log off.

### Firmware Upgrade

The system software used by this router is called as 'firmware', just like any applications on your computer, when you replace the old application with a new one, your computer will be equipped with new function. You can also use this firmware upgrade function to add new functions to your router, even fix the bugs of this router.

Please click **'Management-> Upgrade Firmware'** located at the web management interface, and then the following message will be displayed on your web browser:

**Upgrade firmware**

Firmware version RptM.321.38.1119

Select file

Click **'Browse...'** or **'Choose File'** button first; you'll be prompted to provide the filename of firmware upgrade file. Please download the latest firmware file from our website, and use it to upgrade your router.

After a firmware upgrade file is selected, click **'Upload'** button, and the router will start firmware upgrade procedure automatically. The procedure may take several minutes, please be patient.

**NOTE:** Never interrupt the upgrade procedure by closing the web browser or physically disconnect your computer from router. If the firmware you uploaded is corrupt, the firmware upgrade will fail, and you may have to return this router to the dealer of purchase to ask for help. (Warranty voids if you interrupted the upgrade procedure).

### Factory Default and Settings Backup, Restore

You can backup all Setting of this router to a file, so you can make several copied of router configuration for security reason.

To backup or restore router setting, please follow the following instructions: Please click **'Save/Reload setting'** located at the web management interface, then the following message will be displayed on your web browser:

**Save/Reload settings**

Save settings

Load settings

Reset settings

Save Settings	Press <b>'Save...'</b> button, you can please save it as another filename for different versions, and keep it in a safe place.
Load Settings	Press <b>'Browse...'</b> to pick a previously-saved configuration file from your computer, and then click <b>'Upload...'</b> . After the configuration is uploaded, the router's configuration will be replaced by the file you just uploaded.
Reset Settings	Click this <b>'Load default'</b> button to remove all settings

#### WEEE Directive & Product Disposal

At the end of its serviceable life, this product should not be treated as household or general waste. It should be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or returned to the supplier for disposal.
